

How to Measure Your Horse for a Blanket

Put a tape at point A. in the center of the chest below the neck. Keep the tape level and measure around the front shoulder, stomach and hind quarter into the center of the rear. Keep the tape level at all times. Take the measurement and round up to the next highest even number.

Example:
measured 77", buy a 78" blanket
measured 81", buy a 82" blanket

At Welsh's

All the blankets we carry in stock have open fronts with buckle closure. An 80" blanket will adjust down to a 78" size or can be adjusted up to an 82" size.

Our Return Policy on blankets

To do a test fit of your new blanket, put an old sheet on your horse. Try the new blanket on. If you are not satisfied with the fit, take the blanket off and return in clean unused condition.

WE WILL NOT TAKE BACK DIRTY BLANKETS UNDER ANY CIRCUMSTANCES.

Sale blankets may be returned for credit note only. Absolutely no refunds on sale blankets.
